Lead Abatement

County Environmental Company performed the first certified lead abatement project in Delaware for the Delaware State Housing Authority. This project would be followed over the years by some of the region's most demanding lead abatement projects from historic buildings to Steel Super Structures.

CEC expertly removes lead-based paint, lead dust, and leaded building materials. Abatement techniques may include but are not limited to the following:

- Mechanical Separation
- Chemical Stripping
- Vacuum Blasting
- Wet Blasting
- Industrial Vacuuming
- CO2 Blasting

Our workforce is fully trained and certified in compliance with all state and regulatory agencies.
